

ReviewClaims Test Cases:

Unit Testing :

//Check valid date range and numbers entered

Claim ID: 123

Claim Amount: 50

Action: Approve

Claim ID: 50

Claim Amount: 50

Action: Deny

Reason: not valid

Results: Should display current time on both actions

Claim ID: 123

Status: Approved

Approval Date: Fri, Nov 29 2024 at 12:57 PM

Approved Amount: 50

Claim ID: 50

Status: Denied

Denied Date: Fri, Nov 29 2024 at 12:57 PM

Reason for Denial: not valid

Integration Testing:

//Overwriting check

Claim ID: 123

Claim Amount: 200

Action : Approve

Claim ID: 123

Claim Amount: 250

Results: Approve

Results: Should overwrite to 250 as it is the latest

Claim ID: 123

Status: Approved

Approval Date: Fri, Nov 29 2024 at 01:00 PM

Approved Amount: 250

Total Approved Claims: 1

Total Denied Claims: 0

//Action Check with comments

Claim ID: 0

Claim Amount: 0

Action: Approve

Claim ID: 1

Claim amount: 0

Action: Deny

Comment: amount not valid

Results: Should approve and deny the ID

Claim ID: 0

Status: Approved

Approval Date: Fri, Nov 29 2024 at 01:03 PM

Approved Amount: 0

Claim ID: 1

Status: Denied

Denied Date: Fri, Nov 29 2024 at 01:03 PM

Reason for Denial: amount not valid

Total Approved Claims: 1

Total Denied Claims: 1

//Check for multiple ID same amount and capitalization

Claim ID: 50

Claim amount: 2000

Action: Approve

Claim ID: 60

Claim Amount: 2000

Action: approve

Claim ID: 61

Claim Amount: 2000

Action: Deny
Reason: not valid

Results: Should work with capitalization and without and be able to print out the multiple reports.

Claim ID: 50

Status: Approved

Approval Date: Fri, Nov 29 2024 at 01:16 PM

Approved Amount: 2000

Claim ID: 60

Status: Approved

Approval Date: Fri, Nov 29 2024 at 01:16 PM

Approved Amount: 2000

Claim ID: 61

Status: Denied

Denied Date: Fri, Nov 29 2024 at 01:16 PM

Reason for Denial: not valid

Total Approved Claims: 2

Total Denied Claims: 1

Product Testing:

//Report of results were matching and appropriate

Results: Should be able to process all information and print reports with an outfile.

Enter Claim ID: 50

Enter Claim Amount: 2000

Enter Action (approve/deny): Approve

Claim 50 approved for 2000

Do you want to enter another claim? (y/n): y

Enter Claim ID: 60

Enter Claim Amount: 2000

Enter Action (approve/deny): approve

Claim 60 approved for 2000

Do you want to enter another claim? (y/n): y

Enter Claim ID: 61

Enter Claim Amount: 2000

Enter Action (approve/deny): Deny

Enter reason for denial: not valid

Claim 61 denied for reason: not valid

Do you want to enter another claim? (y/n): n

Claim ID: 50

Status: Approved

Approval Date: Fri, Nov 29 2024 at 01:16 PM

Test Cases for Third Party Processor:

Unit Testing: Transaction validity> if valid it should be completed

```
vector<ThirdPartyTransaction> transactions = {  
    {1, 100.00f, now, "Pending", "ThirdPartyProcessor"},  
    {2, 200.50f, now, "Pending", "ThirdPartyProcessor"},  
    {3, 300.75f, now, "Pending", "ThirdPartyProcessor"},  
    {0, 0.00f, now, "Pending", "ThirdPartyProcessor"}  
};
```

Results: Numbers should match and even should pass with correct date

Sending request to endpoint: api information with payload: { 'transactionID': 1, 'amount': **100.00**, 'date': '2024-11-29' }

Transaction ID: 1, Amount: \$100.00, Date: **2024-11-29**, Status: **Failed**

Sending request to endpoint: api information with payload: { 'transactionID': 2, 'amount': **200.50**, 'date': '2024-11-29' }

Transaction ID: 2, Amount: \$200.50, Date: 2024-11-29, Status: **Completed**

Sending request to endpoint: api information with payload: { 'transactionID': 3, 'amount': **300.75**, 'date': '2024-11-29' }

Transaction ID: 3, Amount: \$300.75, Date: 2024-11-29, Status: **Failed**

Sending request to endpoint: api information with payload: { 'transactionID': 0, 'amount': 0.00, 'date': '2024-11-29' }

Transaction ID: 0, Amount: \$0.00, Date: 2024-11-29, Status: **Completed**

//Integration Testing: check if numbers correctly send to the payment processor and report

```
vector<PaymentHistory> payments = {  
    {1, now, 150.00f, "Credit Card", "Pending"},  
    {2, now, 200.50f, "Debit Card", "Pending"},  
    {3, now, 350.75f, "PayPal", "Pending"},  
    {4, now, 0.00f, "Bank Transfer", "Pending"}  };
```

Results: only correct numbers should pass and save through after processing

Sending request to endpoint: api information with payload: { 'paymentID': 1, 'amount': 150.00, 'date': '2024-11-29', 'method': 'Credit Card' }

Payment ID: 1, Amount: \$150.00, Date: 2024-11-29, Method: Credit Card, Status: **Failed**

Sending request to endpoint: api information with payload: { 'paymentID': 2, 'amount': 200.50, 'date': '2024-11-29', 'method': 'Debit Card' }

Payment ID: 2, Amount: \$200.50, Date: 2024-11-29, Method: Debit Card, Status: **Saved**

Sending request to endpoint: api information with payload: { 'paymentID': 3, 'amount': 350.75, 'date': '2024-11-29', 'method': 'PayPal' }

Payment ID: 3, Amount: \$350.75, Date: 2024-11-29, Method: PayPal, Status: **Failed**

Sending request to endpoint: api information with payload: { 'paymentID': 4, 'amount': 0.00, 'date': '2024-11-29', 'method': 'Bank Transfer' }

Payment ID: 4, Amount: \$0.00, Date: 2024-11-29, Method: Bank Transfer, Status: **Saved**

Product Testing:

Results : All Above should pass and then output to a file successfully

Sending request to endpoint: api information with payload: { 'transactionID': 3, 'amount': 300.75, 'date': '2024-11-29' }

Transaction ID: 3, Amount: \$300.75, Date: 2024-11-29, Status: **Failed**

Sending request to endpoint: api information with payload: { 'transactionID': 0, 'amount': 0.00, 'date': '2024-11-29' }

Transaction ID: 0, Amount: \$0.00, Date: 2024-11-29, Status: **Completed**

Sending request to endpoint: api information with payload: { 'paymentID': 1, 'amount': 150.00, 'date': '2024-11-29', 'method': 'Credit Card' }

Payment ID: 1, Amount: \$150.00, Date: 2024-11-29, Method: Credit Card, Status: Failed

Sending request to endpoint: api information with payload: { 'paymentID': 2, 'amount': 200.50, 'date': '2024-11-29', 'method': 'Debit Card' }

Payment ID: 2, Amount: \$200.50, Date: 2024-11-29, Method: Debit Card, Status: Saved

Sending request to endpoint: api information with payload: { 'paymentID': 3, 'amount': 350.75, 'date': '2024-11-29', 'method': 'PayPal' }

Payment ID: 3, Amount: \$350.75, Date: 2024-11-29, Method: PayPal, Status: Failed

Sending request to endpoint: api information with payload: { 'paymentID': 4, 'amount': 0.00, 'date': '2024-11-29', 'method': 'Bank Transfer' }

Payment ID: 4, Amount: \$0.00, Date: 2024-11-29, Method: Bank Transfer, Status: Saved
