

User Documentation

Overview

This document provides detailed instructions on how to install and use Shazam Insurance Management Application (SIMA) . The software is designed for customers, agents, adjustors, and managers, with distinct roles and functionalities tailored for each. The product is distributed through GitHub Releases and includes six functions: login and registration, customer account information, claims management, claims review, agent information, and third-party payment processing. This guide explains each feature and its usage showing why it's a good product for an auto insurance company.

Installation Guide

Prerequisites

1. A computer with internet access.
2. A GitHub account (optional for downloading the release).
3. Software is currently in C++

Installation Steps

1. Navigate to the [Github release page]
2. Download the latest release package for your operating system..
3. Extract the downloaded package to your preferred location.

Starting the Application

1. Open the extracted folder.
 2. Launch the application by running the appropriate executable or command.
 - Example: app.exe on Windows for C++-based software.
-

Features and Usage Guide

1. Login and Registration

For Customers:

- Open the application and select **Login**.
- If you already have an account, enter your credentials.
- If not, click **Register** and provide the required details

For Agents/Adjustors/Managers:

- Use your employee credentials to log in. The system will recognize your role and grant access to the appropriate functions.
-

2. Customer Account Information

Purpose: View personal and policy details.

Steps:

1. Navigate to **Account Info** after logging in.
 2. View your profile, which includes:
 - Name, address, and contact details.
 - Current policy information.
 - Monthly balance and payment due date.
-

3. Making a Claim

Purpose: Submit claims for vehicle incidents.

Steps for Customers:

1. Navigate to **Make a Claim**.
2. Fill in the claim form with the following details:
 - Vehicle information (e.g., make, model, year).
 - Details of the incident.
 - Third-party information (if applicable).
3. Submit the claim.
4. Optionally, contact an agent for assistance.

Steps for Agents:

- Access customer-submitted claims and assist in finalizing the claim details.
-

4. Review Claims

Purpose: Approve or deny submitted claims.

Steps for Adjustors:

1. Navigate to **Review Claims**.
2. Create a claim on the system that is on file.
3. Approve or deny the claim.
4. If denying the claim, provide a reason in the comments section.

Steps for Managers:

- Access the **Review Claims** section to override decisions made by adjustors, if necessary.
-

5. Agent Information

Purpose: Provide customers with details about their assigned agents.

Steps for Customers:

1. Navigate to **Agent Info**.
 2. View the agent's profile, including:
 - Agent ID.
 - Name and contact information (email, phone).
 - Policies handled.
-

6. Third-Party Payment Processor

Purpose: Demonstrate integration with a third-party payment API.

For Demonstration:

1. Navigate to **Third-Party Processor**.
2. Review the simulated payment workflow, which includes:
 - Transaction details.
 - API request structure.
 - Response handling (e.g., payment success or failure).

Note: The demo substitutes the actual API but illustrates how the integration can be implemented by the client's development team.

Troubleshooting

- **Error:** Unable to log in.
 - **Solution:** Ensure your credentials are correct. Reset your password if needed.
 - **Error:** Application fails to start.
 - **Solution:** Verify that all prerequisites are installed. Check the installation steps.
 - **Error:** Missing data or incorrect display.
 - **Solution:** Contact technical support with details of the issue.
